Window $X$
$25 \times 20 \times 6$
(sensors, samples, channels)
Temporal encoder
shared GRU,
128 units per node
Spatial GNN
4 layers on the
measured-only graph
Node classifier
batch norm, ReLU,
dropout, linear (26)
Soft vote
over the 25 nodes
$\rightarrow$ class $\hat{y}$
embedding per node
message passing
logits per node
